## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 4\_Q4

Attempt : 1  
Total Mark : 10  
Marks Obtained : 10

#### Section 1 : Coding

##### 1. Problem Statement

Arjun is learning how to filter words from a sentence based on grammar rules. He wants to identify the valid words in a sentence.

A word is considered valid if it satisfies all these conditions:

The word contains only alphabets (a–z, A–Z). The word length is at least 2 characters. The word should not contain digits or special characters.

Your task is to read a sentence and print all the valid words in it.

##### ***Input Format***

The input contains a single line containing a sentence S.

##### ***Output Format***

The output prints all the valid words separated by spaces.

If no valid word exists, print "No valid words."

Refer to the sample output for formatting specifications.

### **Sample Test Case**

Input: Hello world1 123 ab" @#\$ Hi

Output: Hello Hi

### **Answer**

```
// You are using Java
import java.util.*;
class main{
    public static void main(String[] args){
        Scanner sc = new Scanner(System.in);
        String[] arr = sc.nextLine().split(" ");

        ArrayList<String> validwords = new ArrayList<>();
        for(String word : arr){
            if(word.length() >=2 && word.matches("[a-zA-Z]+"))
                validwords.add(word);
        }
        if(validwords.size() ==0){
            System.out.println("No valid words.");
        }
        else{
            System.out.println(String.join(" ",validwords));
        }
    }
}
```

**Status :** Correct

**Marks :** 10/10
